

## Boy George at Fermilab

30 cm x 30 cm  
12" x 12"

Boy George at Fermilab is on a 7/8" panel. The paint / resin layer is 7/8" thick with a glossy resin top layer. The painting consists of four paint and four resin layers. The build up of these layers is a bit organic as can be seen in the image above. The finish resin layer was allowed to "roll over" creating a soft rounded edge that distorts light.
